INTRODUCTION

The Assignment 4 is related to creating a user account and maintaining its dashboard where the following operations can be achieved-

- **LOGIN** and **LOGOUT** option from the user dashboard.
- **FETCHING ENTIRE DETAILS OF THE LOGGED IN USER** from the database into the user dashboard.
- **EDITING THE RECORD** from the database through the user dashboard.

SIGNUP FORM

The first step goes with registering or storing the details to the database through the Sign-Up Form.

LOG IN FORM

Once the user registers, he needs to login to his account to get the access of the dashboard. This happens through the Login Form.

This form asks for two details-

1. E-Mail ID
2. Password

The image shows a dark-themed login form titled "LOG IN" in a serif font. It features two input fields: "Email ID" with a person icon and "Password" with a key icon. Below the fields is a link that says "Do not have an Account? REGISTER". At the bottom right is a "LOGIN" button. The form is set against a dark blue background.

THE ADMIN PANEL

After the user logs in to his Account, Dashboard will be displayed which includes the details of the logged in user and the details of other records as well.

When User makes a LOG IN, his E-Mail will be displayed at the top with the help of a concept called as **SESSION**. *(It retains the details of the Logged in User till that User Logs out from his Account.)*

| Occupation | Intern |
| Membership at Kendra | Group |

The ADMIN PANEL provides two options-

- **Dashboard**
- **Edit Details**

DASHBOARD

- ✓ The Logged in User Information includes his Name, E-Mail ID, Contact, Date of Birth and Qualification along with his Profile.
- ✓ The Admin has access to the entire dashboard.
- ✓ He is allowed to Edit his record.
- ✓ The user can also upload his profile picture and once he saves that, the picture will get uploaded.
- ✓ Also, he can edit his profile photo which will automatically get updated in the database when **SAVE** is clicked.

- ✓ Here, the user can change his details and once he clicks the UPDATE Button, his details gets updated to the Database.

EDIT RECORD

This Section allows the user to edit his details. Once he edits his details and clicks on the update button, his records will get updated.

- Once the user clicks on EDIT Button, he will be directed to an EDIT Form, where the user can edit the details of a particular user,
- As soon as the user clicks the UPDATE Button, that record will be successfully updated.
- However, if CANCEL Button is clicked, the Admin will be redirected to the Index Page.
