INTRODUCTION

The Assignment 4 is related to creating a user account and maintaining its dashboard where the following operations can be achieved-

- LOGIN and LOGOUT option from the user dashboard.
- **INSERTING A NEW RECORD** into database from user dashboard.
- FETCHING ENTIRE DETAILS OF THE USER from the database into the user dashboard.
- **DELETING THE RECORD** from the database through the user dashboard.

SIGNUP FORM

The first step goes with registering or storing the details to the database through the Sign-Up Form.

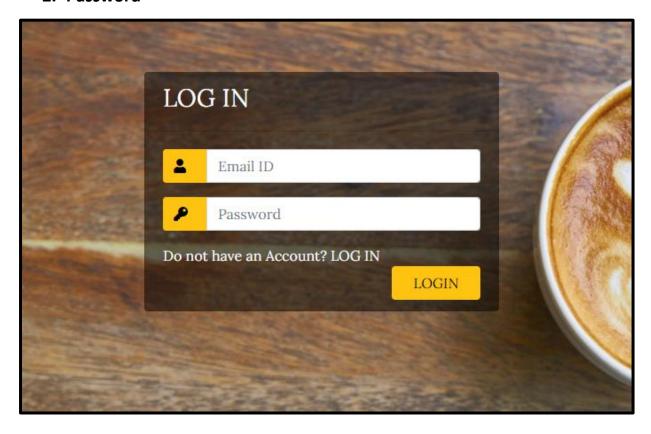

LOG IN FORM

Once the user registers, he needs to login to his account to get the access of the dashboard. This happens through the Login Form.

This form asks for two details-

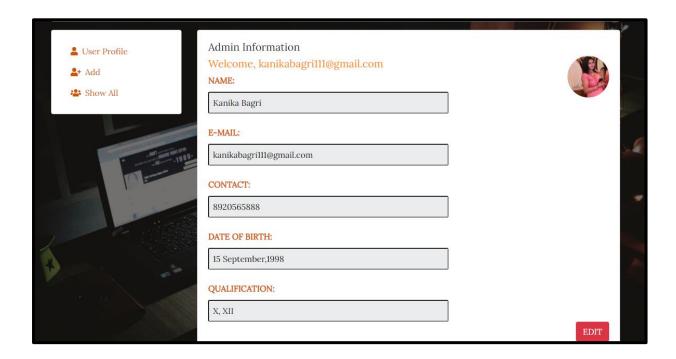

- 1. E-Mail ID
- 2. Password

THE DASHBOARD

After the user logins to his Account, Dashboard will be displayed which includes the details of the logged in user and the details of other records as well.

When User makes a LOG IN, his E-Mail will be displayed at the top with the help of a concept called as **SESSION**. (It retains the details of the Logged in User till that User Logs out from his Account.)

The Dashboard provides three options-

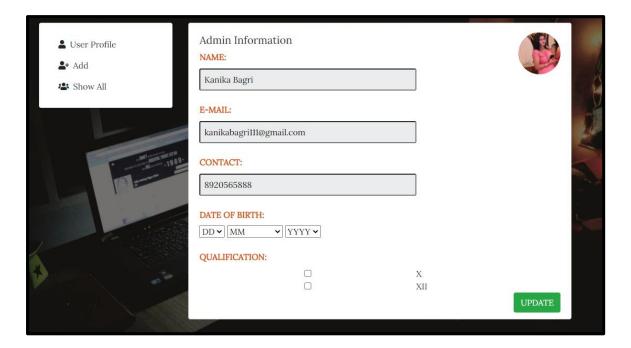

- User Profile
- Add Record
- Show All Records

USER PROFILE

- ✓ The Logged in User Information includes his Name, E-Mail ID, Contact,

 Date of Birth and Qualification along with his Profile on the top right

 corner of the Page.
- ✓ The Admin has access to the entire dashboard.
- ✓ He is allowed to Edit his record.

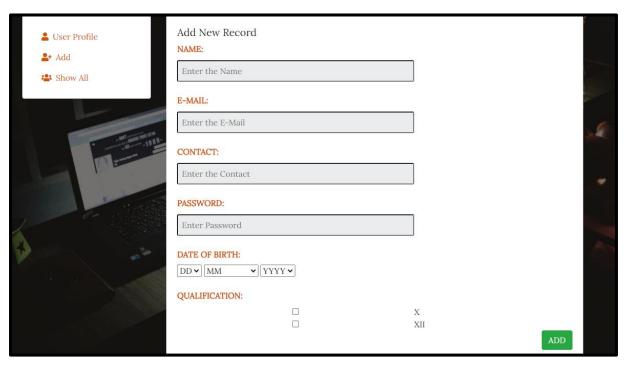

✓ Here, the user can change his details and once he clicks the UPDATE
Button, his details gets updated to the Database.

ADD RECORD

This Section allows the admin to add a new record into the Database.

 Here, the User has to enter the details of a new record he wants to add to the database.

- Once the user fills all the details and clicks on ADD Button, the New User
 Record will be added to the database.
- This New Record can be edited, updated or deleted as well.

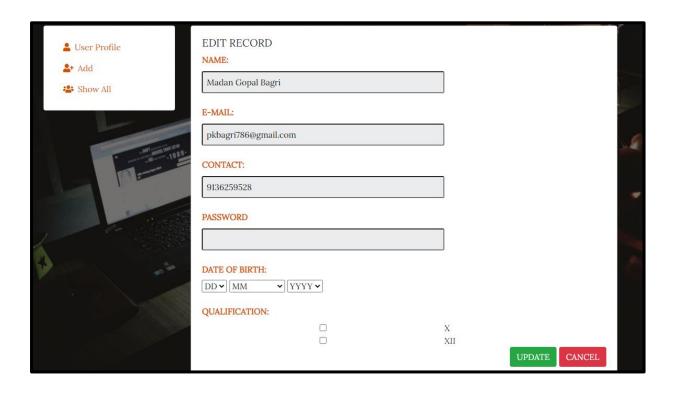

SHOW ALL RECORDS

This Section consists of all the Records of the Database.

- > It includes all the details of a particular user.
- ➤ The Admin has access to Edit and Delete a particular record as per his choice.

- Once the user clicks on EDIT Button, he will be directed to an EDIT Form, where the user can edit the details of a particular user,
- As soon as the user clicks the UPDATE Button, that record will be successfully updated.
- ➤ However, if CANCEL Button is clicked, the Admin will be redirected to the Index Page.

➤ If the DELETE Button is clicked, that particular record will be successfully Deleted.

(Screen Once the Data gets Deleted)

LOG OUT FROM YOUR ACCOUNT

This Section will destroy the SESSION and the Admin will be LOGGED out from his Account.
